

Notice

Tomorrow, Friday, August 25th the utility department will conduct smoke testing on sewer lines on the North end of Homer Rd from 6th Street to the city limits at Cheeseland Road.

Any customer seeing smoke coming out of the ground or if smoke is seen inside your home there is a sewer problem, and this should be addressed by a plumber.

Broken sewer line between the city tap and the home, faulty toilet vents, wax seal, pea traps will allow smoke into your home and must be corrected by the customer to prevent sewer infiltration into your sewer lines and sewer gas from entering the home.
